Release 0.1

Feb 17, 2020

Contents

1	APIS	1
2	Utils	3
3	Mongo	5
	Index	7

CHAPTER 1

APIS

Here we have the different views of the app.

Here we present all the utils used in the system.

`utils.get_entities(interactions, req_entities)`

This method looks for entities in the different interactions.

Args:

param interactions A list of all of users last thread

param req_entities A list of required entities

CHAPTER 3

Mongo

`mongo.get_last_thread(user)`

Parameters:

param user The user object containing all the information of the user.

Check also the TODO lis for this project:

This project is part of the architecture described in: Herrera, Andre & Yaguachi, Lady & Piedra, Nelson. (2019). Building Conversational Interface for Customer Support Applied to Open Campus an Open Online Course Provider. 11-13. 10.1109/ICALT.2019.00011.

G

`get_entities()` (*in module utils*), [3](#)

`get_last_thread()` (*in module mongo*), [5](#)
